### **DETAILED ACTION**

Applicant's election with traverse of Group I invention in Paper No. 15 is acknowledged.

Upon careful review the application, it came to the examiner's attention that the present application is a national stage application based on a PCT application PCT/DK99/00436. A proper restriction requirement in the present application should be written under the PCT Rule. Accordingly, the restriction requirement set forth in the previous Office action is hereby withdrawn and a new requirement in compliance with the PCT Rule is set forth in the following. Any delay in prosecution due to this oversight is regretted.

#### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-4 and 6-20, drawn to a pattern carrier.

Group II, claim 21, drawn to a method for transfer pattern printing using a pattern carrier.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The requirement of a paper as the pattern carrier with specific air permeability and water absorption capability ratings in the Group I claims is not at all required by the Group II claim. It is clear from the Group II claim that a paper of a quality

other than the quality of paper as required by Group I claims can be used to carry out the transfer pattern printing method.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
